

T-M109RAC

NP246 - NP261 - NP263

'99-up General Motors full-size truck

Front output seal installation tool

Easily places this expensive two-piece seal where it needs to be, **every time**.

Precision milled from stout DuPont™ Delrin® (an acetal resin). In one motion this seal driver simultaneously accomplishes **three** things:

- 1) Pilot centers tool inside output shaft as milled cavity accepts splines
- 2) Outer recess drives outer seal into case
- 3) Raised surface drives inner sleeved wiping seal onto the output shaft

**The fast, easy way for in-vehicle repair:
Designed for a lifetime of daily usage!**

▼ Seal, for visual reference; note the two driving surfaces

Answering challenges with profitable solutions.
