Thank You for your purchase!

www.Adapt-A-Case.com

NOTE:

**A74761DAC REQUIRES
use of '87-up 4L60/E
low roller clutch.**

NOT INCLUDED

1.

▲ Place A74761DAC into position as you would a factory support.*
NOTE: Factory anti-rattle clip must be discarded

2.

▲ Install support retaining ring into groove of case.

3.

▲ Align and place retaining plate into case.
It fits snug so you may need to gently tap into place.

4.

▲ Install 6 allen-head screws and torque to 100-110 inch-pounds (approx. 9ft lbs)

* **Factory center supports are selective (differing thickness). Be sure to check low/reverse clutch clearances during installation, adjustments can be made using selective steels/spacer plate.**
