

# Pump Alignment Clamp Tool

**T-7867AC**

**Universal**

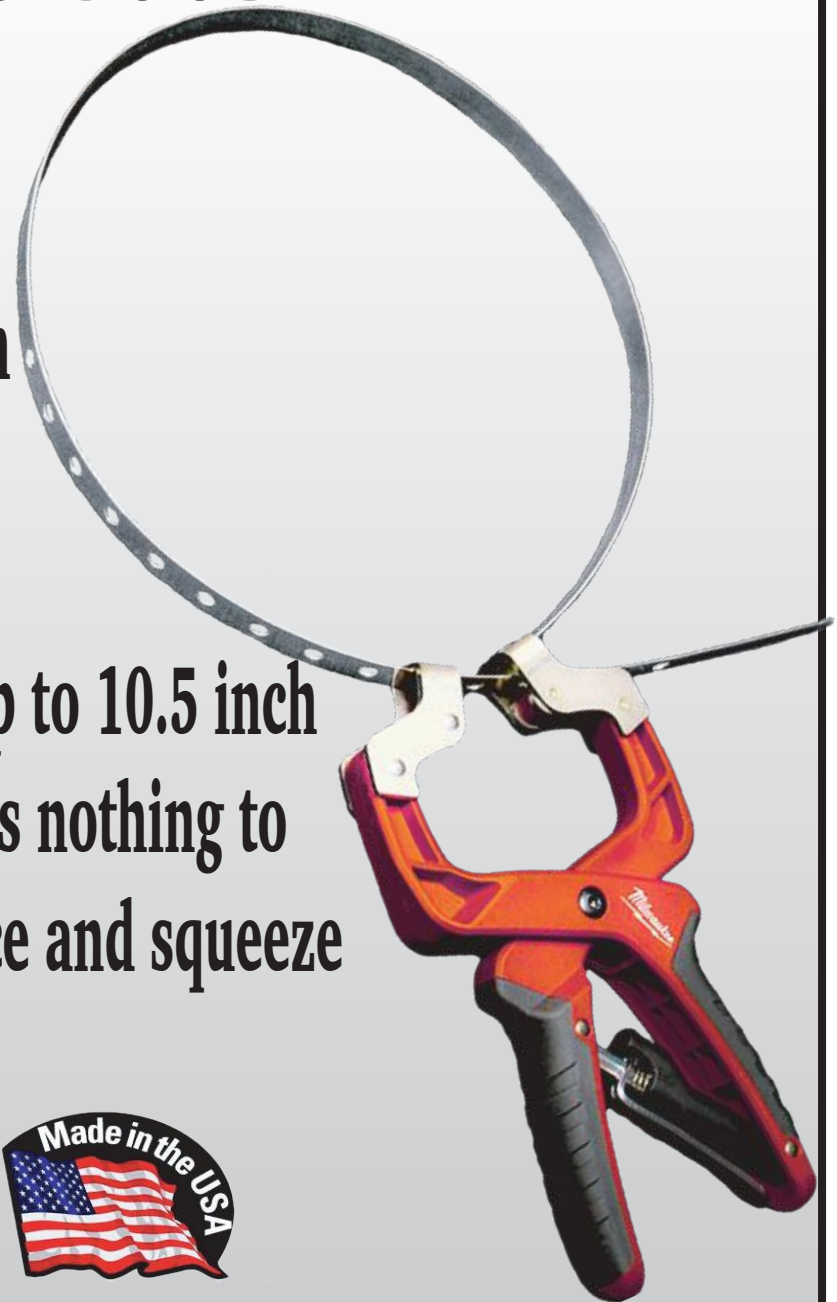

Adapt-A-Case has a tool that changes the way to align the pump on almost every transmission (excludes 6L80). Many different tools exist but they all seem to come up short somewhere.

T-7867AC aligns pumps from 7 inch diameter up to 10.5 inch diameter (plenty big for those 4R100's). There is nothing to twist by hand or with pliers . Simply put in place and squeeze the handles.
